PROFESSIONAL DEVELOPMENT & TECHNICAL PROJECTS

Management Leadership for Tomorrow | Washington, D.C. | Turn Pro Participant

June 2023 - Present

- Engage in this professional development program for diverse undergraduate talent attending select colleges and universities
- Complete program coursework to hone career-development aptitude and industry knowledge
- Attend events hosted by industry leaders in technology, financial services, consulting, marketing, HR and healthcare

Education At Work | Tempe, AZ | Enterprise Microsoft Technical Support

Jan 2023 - July 2023

- Run diagnostic tests, analyze error logs, and leverage technical documentation to identify root causes and implement effective solutions
- Create detailed work orders and documentation to track and communicate the status of technical issues, ensuring transparency and efficient workflow management
- Exceeded the company's service level agreements (SLAs) by resolving technical issues within defined timeframes

EffortLogger v2.0

Fall 2023

Leading a team of five, this project builds a software program using Java to provide privacy for users, and eliminate incoordination potential within teams in Sprint Planning and other management processes.

- Followed Agile/Scrum methodologies in development process
- Built on Eclipse using JavaFX with FXML for UI/UX design. MySQL for database management
- Full development process documentation. (End-to-end service, development testing, UML diagrams, etc.)

Spotify WebAPI

Fall 2023

Javascript and PUG project integrating Spotify's API into a web application, allowing users to authenticate, access their top tracks, artists, and genres, and receive personalized recommendations.

- Successfully integrated OAuth2 authentication, token management, and making diverse API requests to fetch user data. Leveraged asynchronous JavaScript using async/await to handle multiple API requests concurrently
- Developed the backend of the application using Express.js, creating robust routes, handling authentication flows, and serving dynamic content to the frontend.
